Robbin' Eggs!

How to play

Contents
Robbin' Nest, 18 Robbin' Eggs (12 positive-numbered blue eggs and 6 negative-numbered green eggs), 30 Cards, Die, Score Pad, and Pencil

Object of the game
Turn over eggs one at a time trying to get the sum of your eggs as close to the number rolled. If your sum is more or less than the number rolled you will receive penalty points equal to the difference. The player with the lowest score after five rounds wins!

Setting up the game
1. Place the nest in the center of the playing area.
2. Randomly place all 18 eggs in the nest with the numbers face down.
3. Shuffle the card deck and place it in the nest.
4. Place the score pad, pencil, and die near the nest.
Scrambled Eggs

Penalty Point: If you roll a 2 and your total sum is 2, then score 0.

The Yellow Eggs have negative numbers -1 through -6 on the bottom. When summing these eggs over, SUBTRACT.

Remember where those eggs are! Pay attention during your turn.

Other Stuff

The player with the lowest score wins the game.

Winnning the Game

After two rounds, tally up the scores on the score pad.

What to do on your turn

1. Always start your turn by drawing a card from the deck. (If you draw a special card, see below.)
2. Follow the directions on the card (if you draw a special card, see below).
3. When adding or subtracting the eggs, you're going clockwise.
4. Remember to add the eggs as you pass them.
5. When the eggs are added, write the total on the score card.
6. The turn player's total gets added to the score (on the opposite side of the egg you drew it from).
7. Remember your score is zero if you're able to match the total.
8. If the number of eggs is 1 or 2, score 0 points. If you're able to match the total, then the sum of the eggs equals 0. Subtract the difference. Remember you roll 12 when the sum of the eggs equals 0. If your sum is more or less than the number of eggs, you must subtract the number of eggs from the score on the score card.
9. After two rounds, tally up the scores on the score pad.
10. The turn player's total gets added to the score (on the opposite side of the egg you drew it from).
