Magic Cauldron™

Instructions

Contents
- 4 Cauldron Playing Boards
- 40 Picture/Number Cards
- 40 “Magic” Addition and Subtraction Cards
- Instructions

Object
The first player to fill up his/her cauldron playing board wins the game.

Set-Up
- Punch out all the square and rectangle cards and separate into two piles.
- Shuffle the square (picture/number) cards and place in a pile picture side up.
- Shuffle the rectangular (“Magic” Addition & Subtraction) cards and place in a pile number side up.

Playing the Game
1. Each player chooses a cauldron playing board.
2. The youngest player goes first by choosing a square card. The player flips the card over and looks at the number on the back of the card. Then the player finds a number sum (rectangular card) that he/she thinks gives them the correct answer.
3. The player then rubs the magic black mark on the back of the rectangular card to see if the number revealed matches the number shown on the square card.
4. If the numbers match, the square card is placed picture side up onto the cauldron playing board and the rectangular card is removed from the game. If the number does not match, the cards are returned to the correct piles. Play passes to the left.

Winning the Game
The first player to fill up his or her cauldron by correctly matching 10 square number cards with 10 magical rectangular cards wins the game.
